- d. Materials used in construction: generally stone or brick, although some structures were built chiefly of wood.
- 3. I have no information as to the cost of construction, the manhour requirements or any other data on construction of military buildings.

 25X1X

 As an example, the cost of building a standard four-room Czech house was 300,000 crowns, which, at the exchange rate of 50 crowns to one US dollar, would be approximately \$6,000.
 - 4. Construction of civilian buildings was practically nonexistant. All construction materials were controlled by the government, which meant that all available materials were being ear-marked for government construction only; this included construction of military buildings.
